Our Customers

A reputable distributor of office automation, banking product, electronic fire and security system, established in 1976, has more than a decade's experience in distributing products to corporate and government. And in 2000 we had a differentiation product on warehouse racking with brand WESTAR. Using the best and most appropriate products that provided through partnerships with the world's leading company, ensures PT. ANEKA STAR to deliver premium business results.

PT. ANEKA STAR
**Vision
& Mission**

VISION / VISI

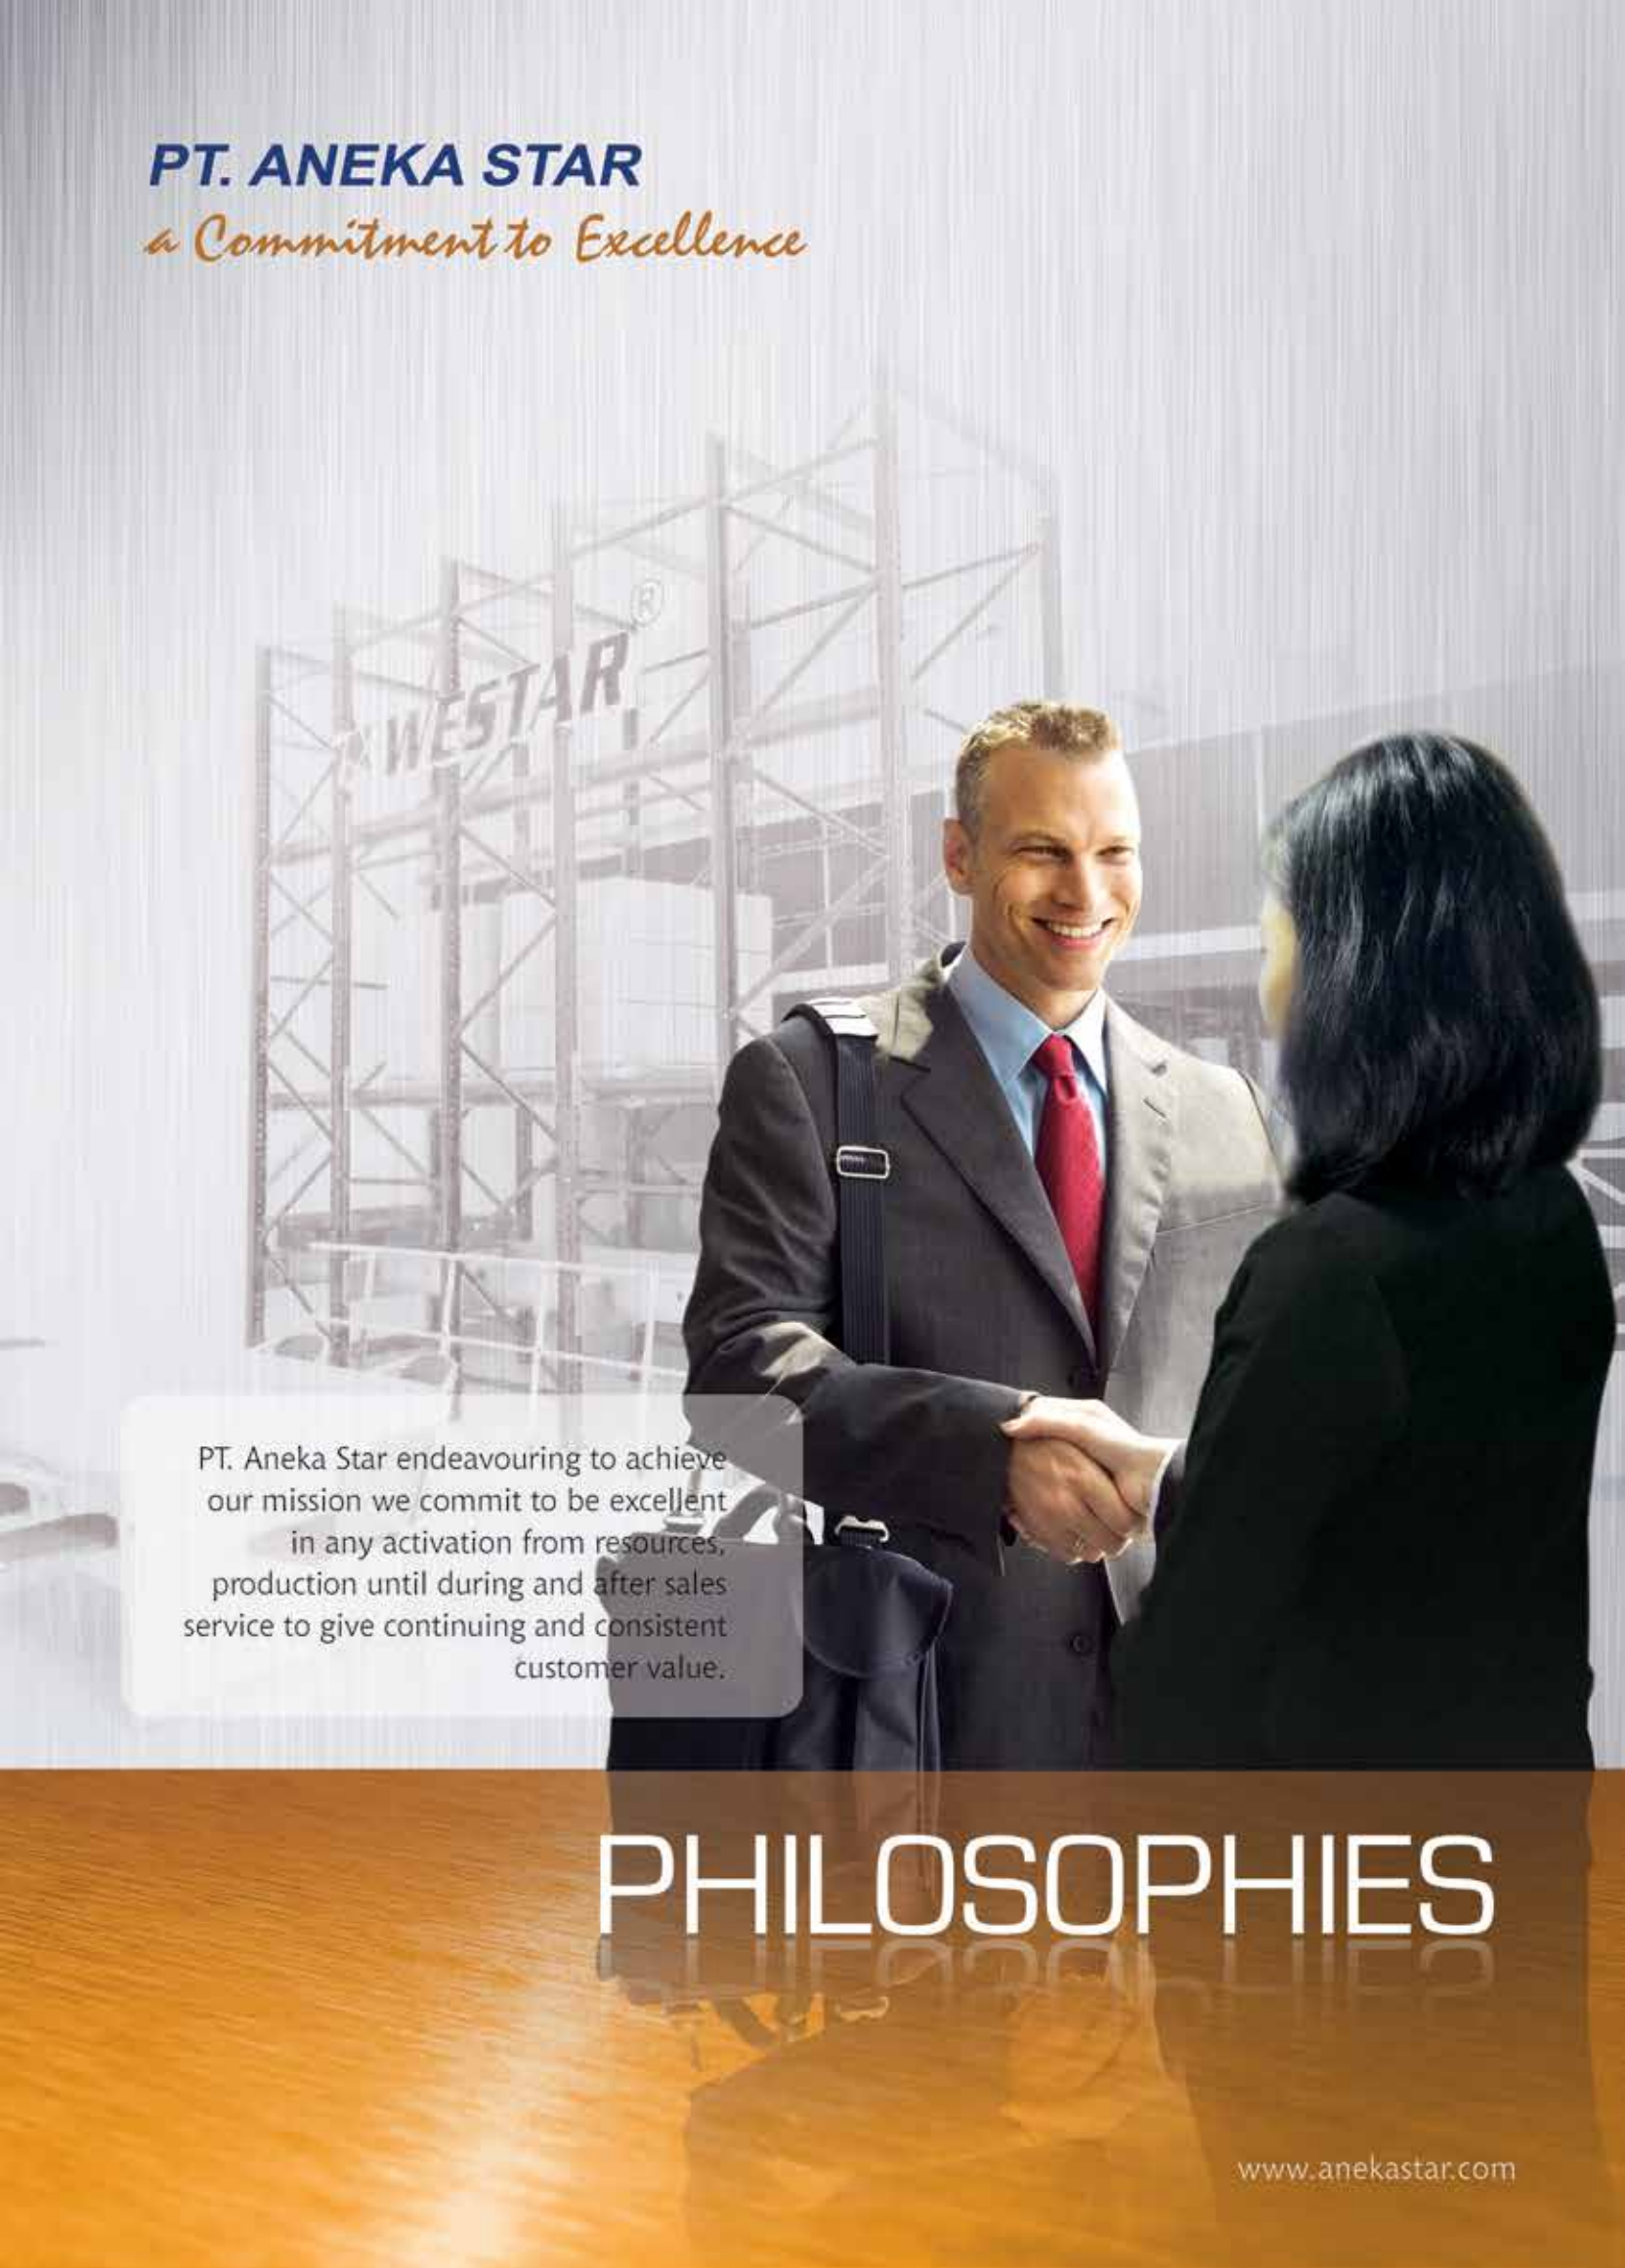

- *To be the visionary company in the Global industrial market*
- Menjadi perusahaan yang visioner di pasar industri Global

MISSION / MISI

- To satisfy customer needs by focusing on high quality products
- Memenuhi kebutuhan kepuasan pelanggan dengan fokus terhadap kualitas produk yang tinggi
- To develop every process to be the best in all of our actions
- Mengembangkan di setiap proses supaya menjadi yang terbaik di setiap kegiatan

PT. ANEKA STAR

a Commitment to Excellence

A man in a dark suit, light blue shirt, and red tie is shaking hands with a woman with long dark hair wearing a black blazer. They are standing in front of a large industrial building with a metal framework. A sign on the building reads 'WESTAR' with a registered trademark symbol. The man is smiling and looking at the woman. The woman is seen from the back/side. The background is slightly blurred.

PT. Aneka Star endeavouring to achieve
our mission we commit to be excellent
in any activation from resources,
production until during and after sales
service to give continuing and consistent
customer value.

PHILOSOPHIES

www.anekastar.com

Our **commitment to excellent** is always measured by our customer's satisfactions, that's why we want to be viewed as a partner rather than a supplier to our customers. To be a partner we know the value of our service depends a great deal upon the degree to which we understand the workings of our customers business.

PT. ANEKA STAR

And since 2000 PT. ANEKA STAR has been expanded to industrial market and make differentiation product on storage racking system with brand name WESTAR. Our production line make use of the CNC bending and roll forming technologies, robotic welding and powder coating line complete with pre-treatment facilities.

Pallet Rack SYSTEM

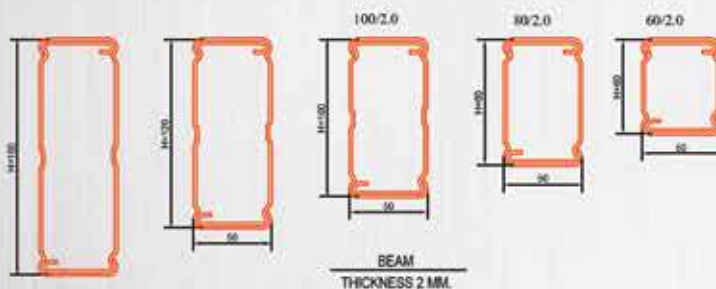

The most common method of storing pallets is Selective Pallet Rack, a storage system designed to provide ready access to every pallet. It can be serviced by virtually any type of forklift including counter balanced and reach trucks. Accessories enable the pallet racks to be adapted to the requirements of the goods

The image shows a wide-angle view of a busy industrial manufacturing facility. In the foreground, there are two large, complex machines with multiple rollers, likely part of a metal rolling process. A long, continuous strip of metal is being processed by these machines. To the left, there are several large stacks of finished metal products, possibly coils or sheets. In the background, there are more machines, including a large green machine with the brand name 'SEYI' visible. The floor is concrete and has yellow safety lines. The overall scene depicts a large-scale production environment.

SACO
AIRPORT EQUIPMENT

Cargo Handling Systems

GENERAL AIR CARGO

Based on 5 decades of relevant experience, SACO has a full set of handling equipment available to configure any solution that may be required. This includes storage and conveyor decks, truck docks, dolly docks, workstations, scissor lifts, ULD hoists, (elevating) transfer vehicles ((E)TV's, pallet masters / slave pallets, Depending on the required capacity, ULD storage systems can be based on ETV's or on the Lift & Run principle incorporating multiple TV's and hoists.

Interroll Versi Flow
**THE PERFECT SOLUTION
FOR LOADS IN THE LOW
TO MEDIUM WEIGHT
CATEGORY**

Interroll Versi Flow guarantees faster access to stored goods as well as ergonomically improved storage and picking processes.

- High density storage with up to 90% space utilisation
- Suitable to all racking systems
- Retrofit conventional racking into flow storage
- Robust construction
- Fast assembly – drop modules
- Great flowability – large wheels diameter

Save up to 50% space and energy
**INCREASED PRODUCTIVITY FOR
DISTRIBUTION CENTERS**

Interroll dynamic storage solutions help warehouses, distribution centres and manufacturing plants save up to 50% space and energy and increase

- Modules for high-density FIFO pallet flow storage
- For racks from all leading manufacturers worldwide
- Energy-saving gravity lanes
- Travel distances reduced by up to 80%

INSPIRED BY EFFICIENCY

Power Roller

Intelligent Control Card

The control card for DC brushless motor power roller is dedicated designed for automatic transmission system, offering smooth, quiet, and highly effective control application. The card's characteristics are :

1. Built-in ZPA (Zero Pressure Accumulation), Master / Slave control logic or external PLC control. Their respective functions are :

- ZPA : include Accumulation, Singulation (SING), Train (SLUG), Back to back, Lost Box Detection, Jam Timer, and Run Hold Timer applications.
- Master / Slave: In case of ascending or descending, master and slave control cards are both used to produce larger torque. To start or stop the motor is purely controlled by the master control card which is connected directly with the slave control card via I/O port.

2. Up to 24 switches for:

- Controlling motor speed (16 speed selection)
- Changing direction (CW/CCW)
- Soft starting / stopping timer setting
- Controlling the accuracy of photoeye's input/output
- Controlling each signal's input/output (NPN/PNP)

3. With 100mA driving force, 4 sets of NPN or PNP output signal are capable of directly driving external relay or PLC.

4. Protection Functions

- Card over-temperature, under-voltage, over-current and short circuit protection, built in anti-reversed diode.
- Motor anti-lock and over-heating protection.
- Protection for output and photoeye short circuit.
- LED Warning : can flash LED light to indicate different abnormalities.

5. RoHS Compliant.

Re : WESTAR PRODUCT

Jakarta, 05.02.2010

The product 'WESTAR' manufactured exclusively by PT. ANEKA STAR has been tested by Balai Besar Teknologi Kekuatan Struktur - BPP Teknologi Indonesian.

Numerous tests were conducted to measure the strength of Racking System, the capacity of end component Racking. These tests were undertaken in accordance with the pallet racking design standards as per FEM 10.2.02.

Using these test data, the uniformly safe working loads have been calculated based on high grade steel with guaranteed tensile and yield strength.

The test should be repeated at regular time schedule in order to guarantee in continuity of fabrication quality.

We confirm that WESTAR meets the standards as required
by FEM 10.2.02.
